

# PDF SHARE FORMS

Online, Offline, OnDemand

PDF forms and SharePoint are better together

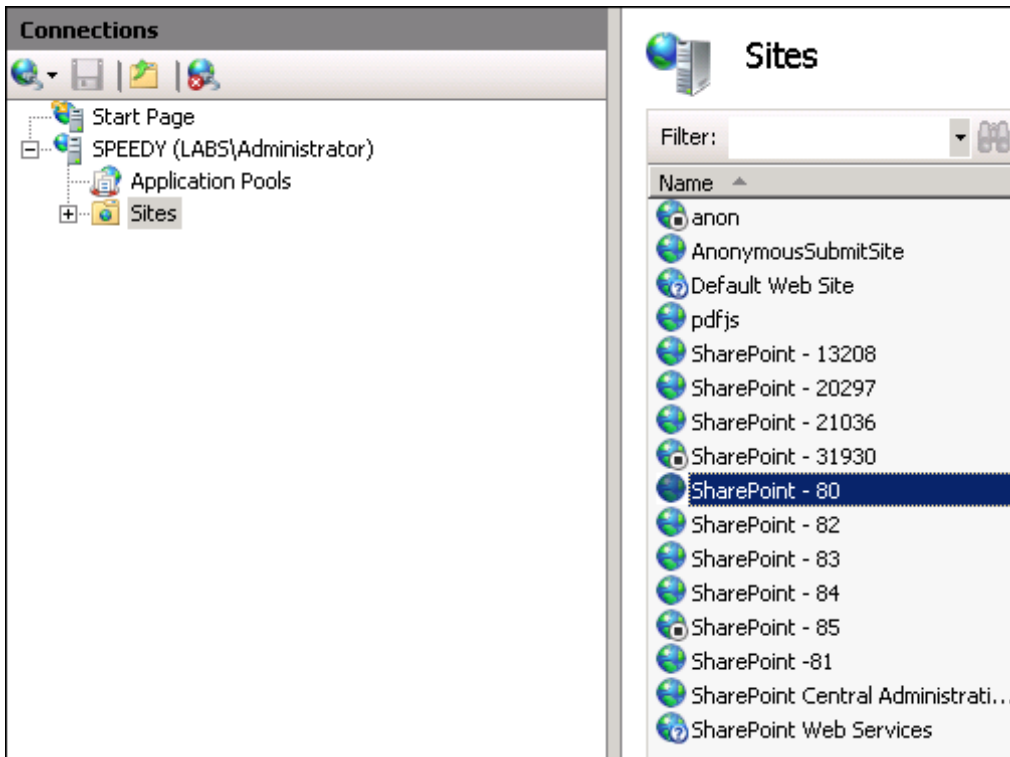

## Manage time-out settings

This guide will show how to increase waiting time for opened PDF documents inside SharePoint.

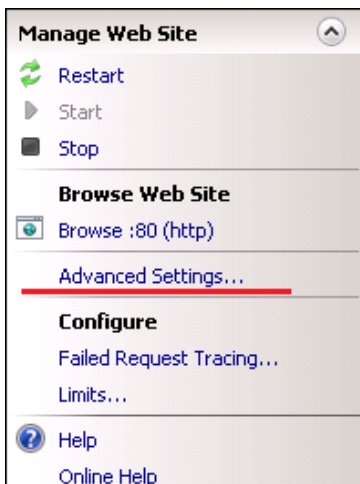

**Step 1.** Setting connection time-out

In order to increase response time for pdf files, need to increase connection time-out on the site where PDF file is opened. To do so proceed with following steps:

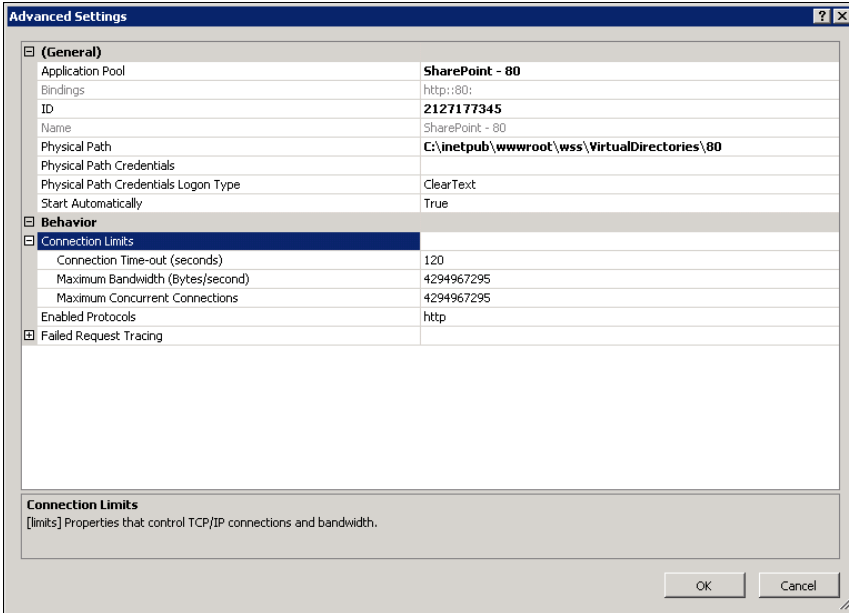

- 1) Open Internet Information Services (IIS) Manager on your server computer;
- 2) Select "Sites" and choose site you are using to work with PDF files from appeared sites list:

- 3) Click on "Advanced Settings..." in "Manage Web Site":

4) In appeared window expand “Connection Limits” in “Behavior” section:

5) Change “Connection Time-Out (seconds)” option from two minutes to desired value (in this example 10 minutes):

6) Click “OK” to close “Advanced Settings” window;

## Step 2. Restarting services

In order apply changings in settings, run “iisreset”:
