Installing Actions for Nintex

Prepare the solution files

Copy PDF Share Forms Installation folders to c:\deploy folder on your SharePoint 2013 server (or some other folders, in that case make sure to change it in all following references).

Adding PDF Share Forms Nintex solution

Run the SharePoint 2013 Management Shell. From SharePoint 2013 Management Shell run:

```
Add-SPSolution c:\deploy\02-PDFShareForms.Nintex\PDFShareForms.Nintex.WSP
```

Installing PDF Share Forms Enterprise solution

From SharePoint 2013 Management Shell install the service application solution using the following command:

```
Install-SPSolution -Identity PDFShareForms.Nintex.WSP -GACDeployment -FullTrustBinDeployment
```

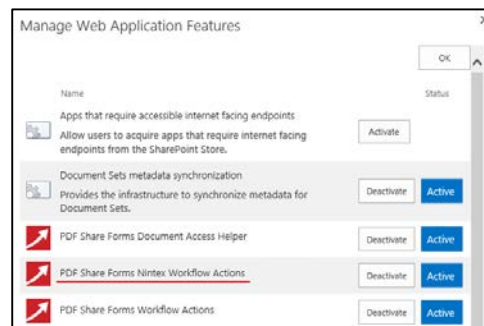

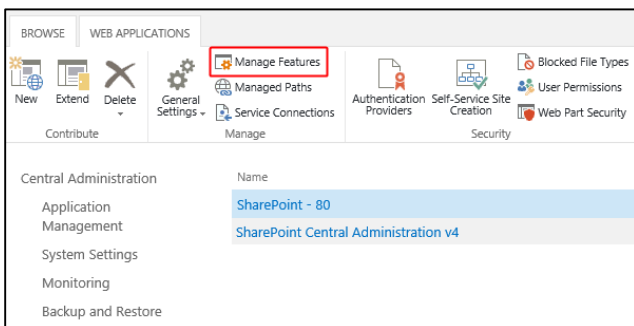

Now, activate corresponding feature using application UI.

Enable PDF Share Forms Enterprise Nintex Workflow Actions application feature

Go to **Central Administration** → **Application Management** → **Manage web application**

Select web application where you deployed PDF Share Forms Enterprise solution.

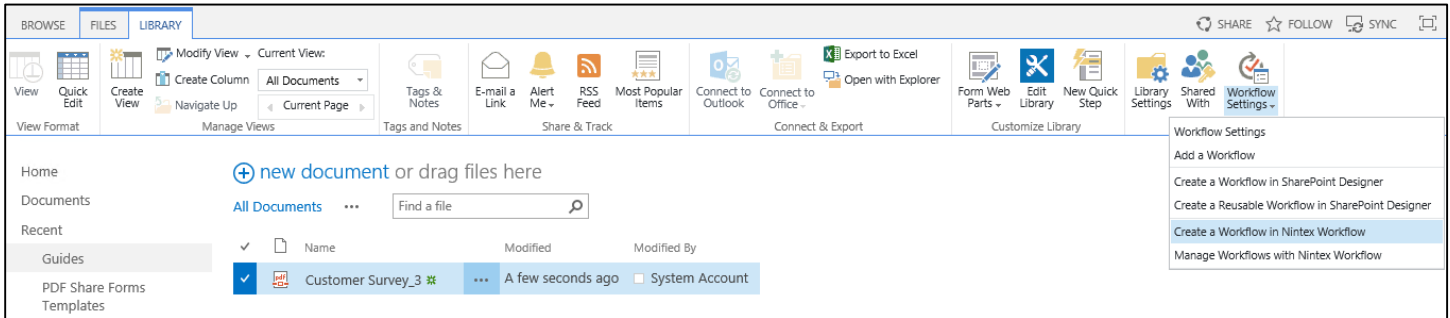

Find feature “**PDF Share Forms Nintex Workflow Actions**” and activate it.

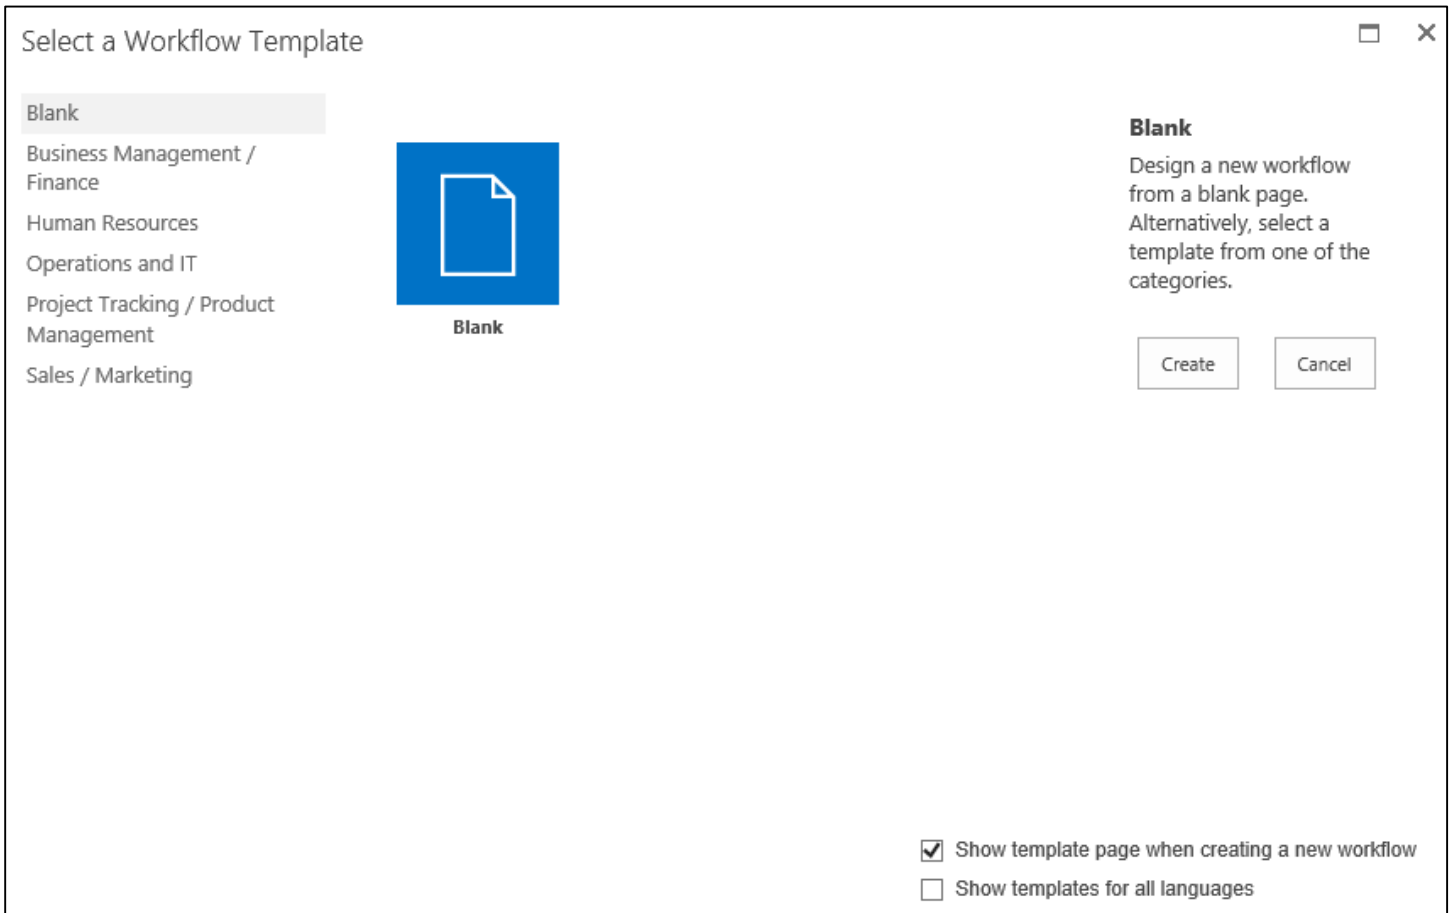

Creating workflow with PDF Share Forms Workflow Actions

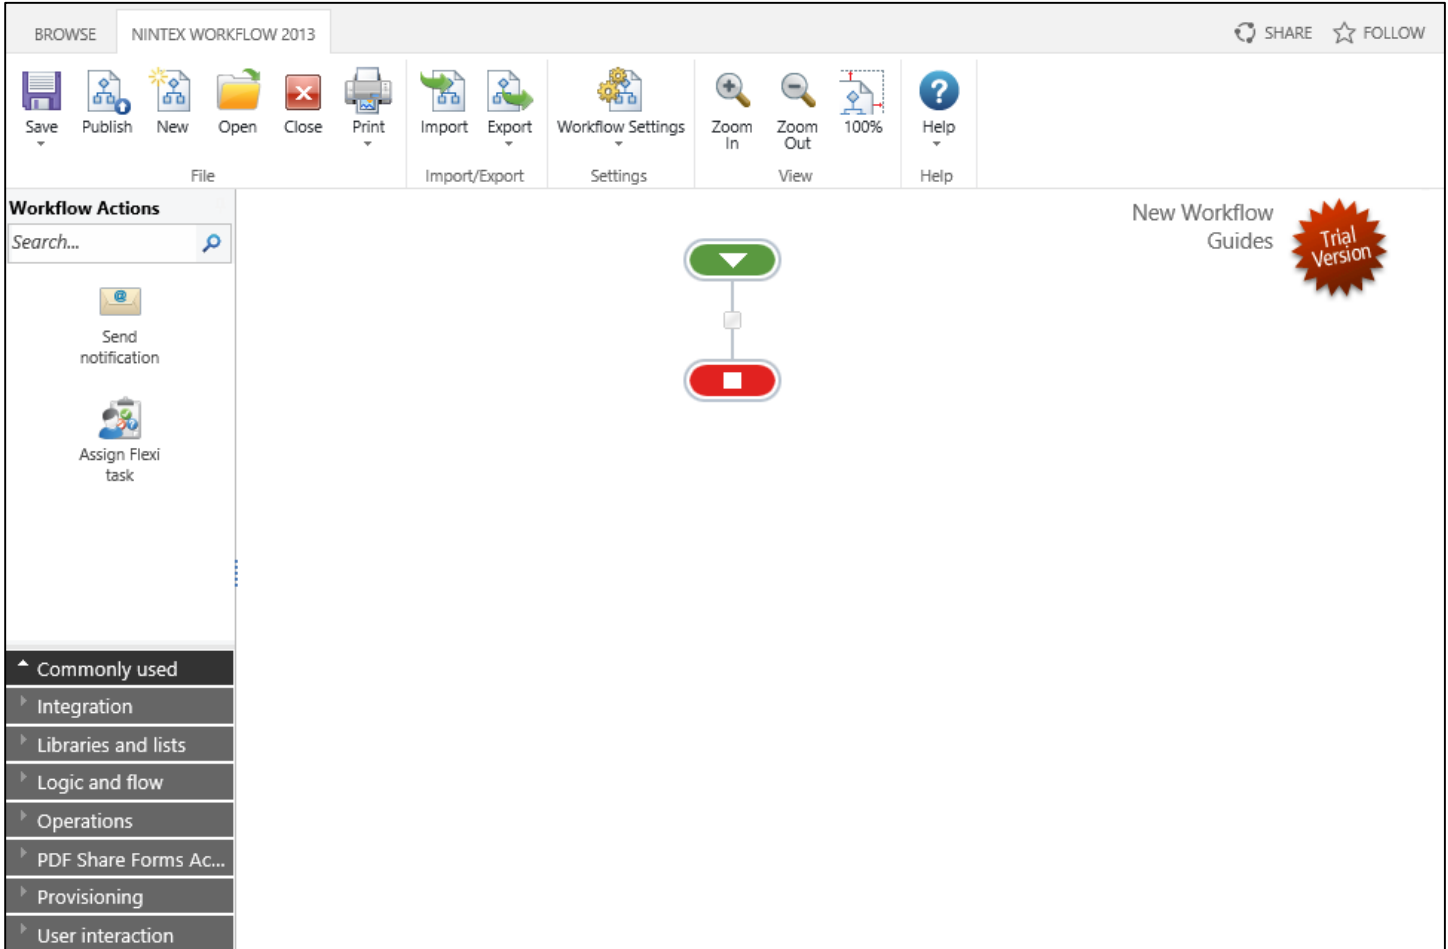

Step 1. Choose the document, Navigate to **Library** → **Workflow settings** → **Create a Workflow in Nintex Workflow**

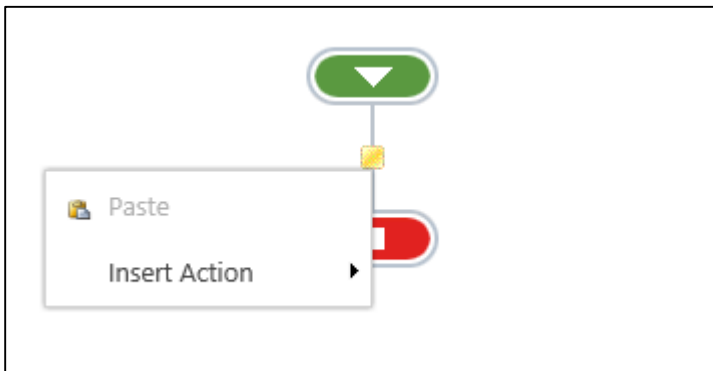

Step 2. The page will open a new window in which will be asked to select a Workflow Template. Press **Create** button.

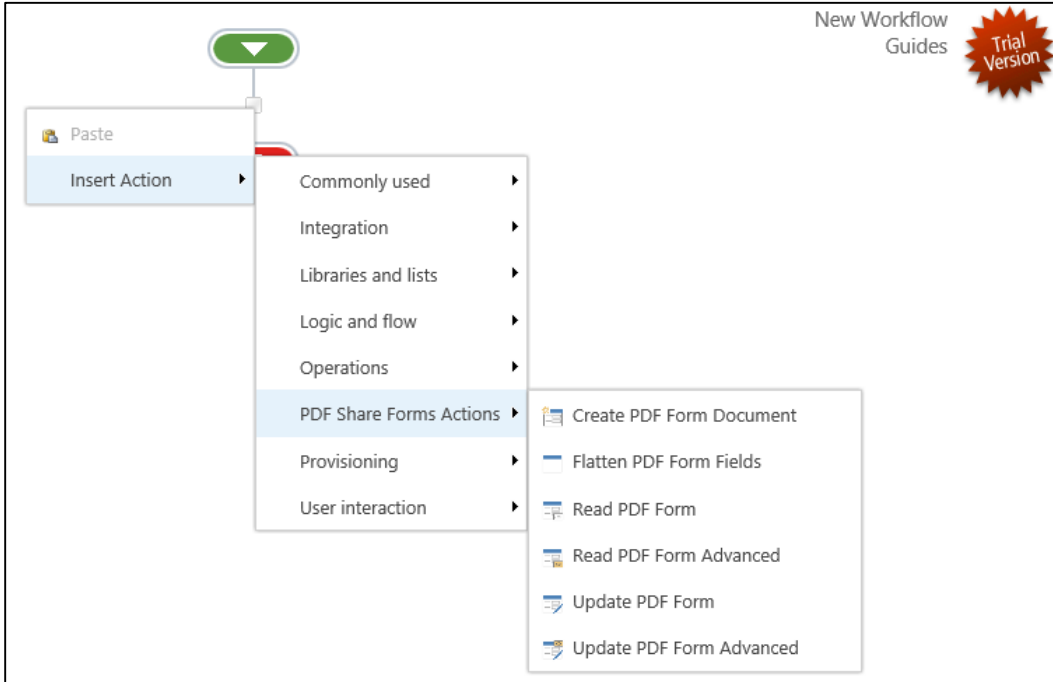

Step 3. New blank workflow sheet will be opened

Step 4. To insert an action choose squire

Step 4.1 Select **Insert Action** and dropdown with actions will appear

Step 4.2 It is also possible to choose an action from the menu on the left
