

Reading values from controls in subforms using SharePoint workflows

Step 1. Fill out the form. As an example, we will use the form with the following value:

<p><i>lives the Express Locations culture.</i></p> <p>Vision</p> <p><i>Be the most preferred sales distribution partner for wireless, broadband and media carriers across the US.</i></p> <p>Mission</p> <p><i>Operate "carrier grade" sales distribution, acquiring quality customers for our carrier partners, providing rewarding employment to our team and creating profit for our stakeholders.</i></p>	<p><input type="checkbox"/> Green Time is Sacred. Works while at work. Lives by What's Important Now.</p> <p><input type="checkbox"/> High level of productivity and consistently raises the bar.</p> <p><input type="checkbox"/> Chases buffalo.</p> <p>Tell us how and when this employee exhibited the culture tenets checked above</p>	<p>Disciplined Action "MultilineTextField"</p>
---	--	--

Step 2. Create a workflow in Workflow Designer using PDF Workflow Support solution:

```
Read value from PDF MultilineTextField2 of Current Item PDF document into variable Variable: Data (Exception to Variable: Exception7)
then Update MultilineTextField1 with value Variable: Data in Current Item PDF document (Exception to Variable: Exception6)
```

In this example a workflow will use current form for reading and writing values.

NOTE: You need only to write fields' names without any mention of subfolders. Here we will read value from „MultilineTextField2” which is located in „Action” subform and write it to „MultilineTextField1” located in „Thought” subform. String variable „Data” will be used to store „MultilineTextField2” value.

Step 3. Publish and run the workflow.

Runtime result

person that without fail has Integrity to their core and lives the Express Locations culture.

Vision
Be the most preferred sales distribution partner for wireless, broadband and media carriers across the US.

Mission
Operate "carrier grade" sales distribution, acquiring quality customers for our carrier partners, providing rewarding employment to

- A sense of urgency which causes a sense of great excitement and responsibility they've been given.
- Knows job and performs it with a high degree of competency and self confidence.
- Bias for action. A sense of urgency drives them to eliminate unwarranted delays.

Tell us how and when this employee exhibited the culture tenets checked above

Disciplined Action "MultilineTextField"

As a result, value from „**MultilineTextField2**“ has been set in „**MultilineTextField1**“.
